

FEED SAFETY POLICY

ATEV Fehérjefeldolgozó Zrt. is committed to ensuring, at all times, the feed safety, legal compliance and traceability of its products throughout the collection, handling and processing of animal by-products and the production, storage and distribution of feed materials.

Our objective is to produce and place on the market only feed materials that, when used as intended, are safe, comply with the applicable legal, official, standards-based and customer requirements, and do not endanger animal health, the safety of the food chain, or the environment.

To this end, we:

- identify, assess and control the biological, chemical and physical hazards associated with our activities and products;
- ensure the proper segregation, handling and full traceability of animal by-products and the feed materials produced from them;
- operate, regularly review and continuously develop our feed safety management system;
- define and regularly evaluate our feed safety objectives, and provide the human, technical and financial resources necessary to achieve them;
- monitor and comply with the legal, official, standards-based, customer and other undertaken requirements applicable to our activities;
- prevent the use and placing on the market of non-conforming, contaminated or potentially unsafe products;
- prepare for the management of emergencies affecting feed safety, and ensure the rapid identification, segregation, withdrawal or recall of unsafe products;
- apply appropriate supplier and subcontractor requirements, and verify the conformity of external service providers and procured products;
- ensure the appropriate professional competence of our employees, their regular training, and the development of their feed safety awareness;
- encourage all employees to report circumstances, non-conformities and improvement opportunities that endanger feed safety;
- ensure the appropriate internal and external communication of material feed safety information to employees, suppliers, customers, authorities and other interested parties;
- regularly measure feed safety performance, evaluate it through audits and management reviews, and implement corrective and improvement actions to eliminate non-conformities.

Establishing and maintaining feed safety is the shared responsibility of all employees. The Company's management is committed to enforcing this policy, to the continuous development of a feed safety culture, and to improving the effectiveness of the management system.

We make this policy known to all employees and to persons acting on behalf of the Company, make it available to interested parties, and regularly review its continuing suitability.

Budapest, 11 August 2026
